

**TECEloop**

**A timeless interpretation of purity and cleanliness**

**TECE:**  
intelligent housing  
technology

## Fascination and elegance of the simple

TECEloop is a versatile range of push plates for toilets and urinals. It has been reduced to a minimum in terms of both formal appearance and dimensions. TECEloop combines a clear, timeless form with unmistakable precision with the ultimate in material aesthetics and clear, self-explanatory operation.

### Timeless clarity

The basic version of TECEloop has a high-quality plastic cover and raised buttons. It is available in white, white antibac, pergamon, matt chrome and bright chrome. It is assembled on the wall in the traditional way, but is especially flat, with an installed height of only 6 mm. The smooth surfaces are easy to clean.

### Winning precision

With its high-quality genuine glass surface in pale green, pure white or formal black, the TECEloop toilet and urinal push plates fit perfectly into an upmarket bathroom environment. As with the basic version, the flat, wall-mounted housing is a source of fascination. The actuating buttons that are fitted level with the main unit emphasise the high level of precision and intuitive operation of the system.

### Pure fascination

With a toilet and urinal push plate that is fitted completely level with the wall, TECEloop offers the ultimate in technical perfection and structural fascination. Its height-adjustable tile frame ensures that it couldn't be easier to assemble. The high-quality glass surface fits elegantly and unobtrusively into the bathroom structure.
