TECEplanus - the new range of push plates for both public and private buildings

The linear design that characterises TECEplanus adds emphasis to the popular stainless steel style. The sturdy push plates are particularly suited to use in public buildings. A concealed screw protects them against theft.

Economical use of water is an increasingly important demand in public buildings, in addition to sturdiness and design. Water saving is particularly effective with the dual-flush option. This principle has become established in private bathrooms. The combination of sturdy stainless steel and dual-flush technology offers new opportunities for schools, office buildings or restaurants.

TECEplanus is a series of push plates made of stainless steel and chromed brass. The plates can be fitted for both top and front operation. They are extraordinarily small but still offer very good accessibility for the mechanical components located behind them.

With four different control options, TECEplanus offers a solution for a range of demands in both public and private bathrooms.

TECEplanus push plate for dual flush

TECEplanus, brushed stainless steel,
order no. 9.240.320

TECEplanus, bright chrome brass,
order no. 9.240.321

TECEplanus push plate for single flush

TECEplanus, brushed stainless steel,
order no. 9.240.310

TECEplanus, bright chrome brass,
order no. 9.240.311

A cistern to match the TECEplanus push plate

The first sealed cistern, fully pre-assembled:
Just connect and it's ready!

- Dual flush to save water consumption (6/3 litre or 9/3 litre)
- 10-litre safety tank - enough water when it matters
- Compatible with commercially available spare parts
- Low noise - complies with noise control standard DIN 4109
- Matching push plates: TECEplanus, TECEambia, TECEantibac and toilet flush handle

For servicing, the entire unit including the lever mechanism, lid and push plate can be removed in one piece. All settings remain unchanged.

TECEprofil universal module for dry wall construction

Order no. 9.300.000

820 mm TECEprofil universal module for low installation heights

Order no. 9.300.001

TECEbox - The TECE cistern for brick wall construction

Order no. 9.370.000

820 mm TECEbox for low installation heights

Order no. 9.375.000
